Drilling/Completion Operations	A closed loop system will be implemented during drilling, using a cuttings "trench", dewatering system, centrifuge system. Any skim oil will be trucked to the Chevron Main Water Plant and then pipelined to the an oil gathering collection station.
Construction	No potion of the cuttings trench will be used to hold liquids, the trench will be constructed entirely in the cut.
Planning	Chevron trains all employees in safework practices, good environmental stewardship, health and wellness issues and to ensure that proper personal protective equipment is available and being used correctly. Chevron has up to date Spill Protection Control and Countermeasure Plans for the Rangely field.
Storm Water/Erosion Control	A diversion ditch will be constructed along the east and south side of location to control runoff and erosion.
