Subject: Amended COAs for Pagoda Unit 33-34P, SENW Sec 34 T4N R 89W, API #05-107-05021, Location #316736, Remediation #7275
Date: Thursday, September 27, 2012 1:32:14 PM

Pagoda Unit 33-34P, SENW Sec 34 T4N R 89W, API 05-107-05021, Location 316736, Remediation #7275

Mr. Wyman,

I have spoken with Alex Fischer regarding your voice mail message to him concerning the COA's for the Form 27 Site Investigation and Remediation Plan for the above referenced location. I have received and reviewed the full analytical report, including the background sample and the chain of custody. Alex indicated that he will accept your aerial photos as sample maps, but will require the sample depths (they are not indicated on the chain of custody form). To that end, amended COAs are:

1. Provide depth of each sample collected;
2. Provide GPS coordinates for all of the pits and the As Drilled location of the well (the Form 4 Sundry submitted was in error); and
3. Sample the area where the blow down line from the separator discharged directly into the road side ditch.

Please refer to Remediation Project #7275 when you submit this information.
