Subject: Amended COAs for Robson-Wyman 14-16, SWSW Sec 16 T4N R89W, API #05-107-06095, Location #316761, Facility ID232681, Remediation #7280
Date: Thursday, September 27, 2012 1:35:09 PM

Robson-Wyman 14-16, SWSW Sec 16 T4N R89W, API #05-107-06095, Location #316761, Facility ID232681, Remediation #7280

Mr. Wyman,

I have spoken with Alex Fischer regarding your voice mail message to him concerning the COA's for the Form 27 Site Investigation and Remediation Plan and the Form 4 Sundry for the above referenced location. I have received and reviewed the full analytical report, including the background sample and the chain of custody. Alex indicated that he will accept your aerial photos as sample maps, but will require the sample depths (they are not indicated on the chain of custody form). To that end, amended COAs are:

1. Provide GPS coordinates for all of the pits;
2. Treat and resample the area to address high SAR and pH level;
3. Delineate potential salt impact in area extending approximately one half mile north of pit; and,
4. Provide depth of each sample collected.

Please refer to Remediation Project #7280 when you submit this update to the Form 27.
