Rick,

Nighthawk will agree to the COA and will be using a closed loop system.

Subject: Nighthawk Production - Torreys Peak 1-19 Form 2A 400325313

Kyla,

I am reviewing the Form 2A location assessment for Nighthawk Production's Torreys Peak 1-19 well location in Lincoln County and have the following comments:

1. Water Resources: Multiple shallow water wells and springs in the region indicate the presence of shallow ground water. In addition the shallow subsurface is comprised of permeable material. Therefore the location is in a Sensitive Area. I have changed the Sensitive Area Designation to Yes.
2. Conditions of Approval: The following condition will apply to this location. Please acknowledge this COA:
 1. Location is in a sensitive area because of shallow groundwater; therefore, either a lined drilling pit or closed loop system is required.

Please contact me with any questions.
