Sarah,

Yes you have our permission to correct the distance on the form 2 to match the updated form 2A. Attached is a lease map. I took a look at the other 3 approved Varra permits and they all have 122 acres still. I think maybe it was the Winder wells we had this issue with, because I created a lease map for those as well.

Jeff is saying he does think the 122 acres is a correct description. Please let me know if that is incorrect and you plan on changing that total acres for the Varra 5-24 form 2.

Thanks!

Hi,

May I have permission to correct the distances on the form 2 to match the 2A. I.e. On the 2, #17. Distance to the nearest... from 447 to 522 (building). Then in the surface and minerals tab you show that the total acres in the lease is 122, yet you've entered and entire mineral lease description as all of section 5 except a portion of the SW/SW which would imply that your acreage is closer to 640. (I think we had the same problem on some of the other Varra wells, but I don't recall what we did to correct it). Then the SUA that you have attached is in metes and bounds so you should have included a lease map. So I need permission to correct #17 from 447 to 522; a corrected lease description; and a lease map.

Thanks,

Thank you Rick. I'll take care of the 2 with them and move this on.

Jessica,

I've attached the revised Location Drawing to the Form 2A and revised the distance to nearest building and public road based on the revised Location Drawing data.

Sarah - these are now different than the Form 2. I'm done with the 2A, but left it on hold until you can change the Form 2.

Rick,

Sorry about that, I guess the surveyor missed the guest house on the last location drawing. (: Now please let me know if this location drawing is up to standards.

Thanks!

Rick,

Here is a newly revised location drawing. Please correct any discrepancies between this location drawing and form 2A distances, to match the distances on this new location drawing, as the COGCC map measurement tool was used before and I'm sure the surveyors distances are more precise.

Thank you!

Jessica,

There are a few additions that need to be made to the drawing - not all improvements were identified - the field road west of the pad, the ditch east of the pad and what might be a shed or garage near the house southwest of the pad.

Also, the distances to the road and the house on the drawing do not match those distances supplied on the Form 2A. Please verify which distances area correct.

Let me know if you have any questions.

Rick,

Please let me know if this new location drawing for the Varra 5-24 well satisfies all the requirements of the COGCC.

Additionally, please let me know, via email, if any of the other form 2/2As (Winder 9-31, 32, 42) are being held up due to the current location drawings.

Thank you!
