Dear Mr. Hines,

Colorado Oil and Gas Conservation Commission (COGCC) staff has reviewed the Notice of Completion Report submitted by Encana on October 16, 2012 for the referenced site. Based on review of data presented, it appears that no further action is necessary at this time at this site. However, should future conditions at the site be discovered of contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be significantly impacted, COGCC may require that further investigation and/or remediation be conducted.

Please note that Conditions of Approval have been added to the Sundry Notice regarding the treatment of impacted material on the 499-12-67 destination pad (Location ID # 316610).

The remediation projects will be closed in the COGCC database with Form 27As and the pit scout cards will be updated to "CL" status. If you require any additional information, please call me at (970) 625-2497.

Sincerely,

Carlos Luján for
