Request for Hearing and Subsequent Approval
Application to Permit Water Disposal Activity
Tyner Lunt No. 1
NW/SE Section 18, T34N, R8W, La Plata County

Amoco Production Company hereby requests that the application to permit water disposal activity in the Tyner Lunt No. 1 be set for hearing on the November docket and the resulting order approve the water disposal activity. Amoco made application to the Colorado Oil and Gas Conservation Commission, in accordance with Rule 326, to permit underground disposal activities in the Tyner Lunt No. 1 on October 3, 1990. Amoco has a pressing need for the subject disposal well and wants to proceed as soon as possible. Approval of the well in November would allow Amoco to proceed with the conversion operations by year end.

Notices to owners of record were mailed via certified mail on October 3, 1990. Our records show that the last notice to an owner was received on October 16. The 15 day protest period ended today, November 1st. We have heard from Ed DiMatteo of your office that there were protests to the use of the subject well for the purpose of water disposal. Amoco maintains that the current conversion plan outlined in the permit application will insure that both hydrocarbon bearing horizons and underground sources of drinking water will be protected from the injection fluid.

In addition there should be on file with the COGCC a copy of the underground injection control permit issued by the EPA for the subject well. This permit supports Amoco's current plans to convert the subject well and sets out stringent operating requirements designed to protect all shallower horizons.
