Fay,

The schedule discussed below is fine. Thank you for the update.
Sincerely,

John Axelson, P.G.

Dear Mr. Axelson,

We would like to update you on the schedule for the closure activities for the Schwake A-2 landfarm in Peetz, Colorado. The excavation of the landfarm, backfilling of the on-site pits and off-site disposal activities are complete. At this time, ERM is assisting East Cheyenne Gas Storage, LLC with the preparation of the closure documentation. We anticipate submitting this to the COCGG by mid to late January. We hope this schedule meets the COGCC's needs for the project.

Kind regards,

Fay

Subject: Schwake A-2 Remediation Plan #4886 Form 4 Approval

Dear Mr. Richards,

The change of remediation plan submitted via Form 4 Sundry Notice for the subject site is approved. A copy of the signed Sundry is attached for your records. If the final confirmation sample results are in compliance with Table 910-1, please submit a Final Closure Request for Remediation Project #4886 after the scope of work has been completed. Include the final sampling results and the soil disposal documentation for waste taken to Buffalo Ridge Landfill. After surface reclamation is complete, I will perform a final inspection to document conditions and the project should be suitable to close.

Thank you,

John Axelson, P.G.
