Anne,

Attached is a unsatisfactory field inspection I received yesterday from our Field Inspection Unit regarding Antero's LundgrenFrac/Flowback Pit Centralized Exploration and Production (CE&P) Facility ID 149019.

Antero is currently out of compliance on a number if issues that are listed in the Field Inspection Form. Additionally, other outstanding issues include:

The COGCC has not received an annual report as required by Rule 908 (9).f.

This facility was not permitted for land farming operations, but appears to have a 40' by 200' land farm as indicated in the unsatisfactory field inspection.

The COGCC has not received a preliminary closure plan as required by Rule 908 (9).g. (see the May 2012 email to Jerry Alberts)

The COGCC believes that this facility does not have adequate financial assurance per Rule 704 and 908 (9).g. (see the May 2012 email to Jerry Alberts)

Thanks
Alex
