Well distance to nearest spacing unit boundary = 460'. Operator notified on 11/26/12 all owners as defined in C.R.S. §34-60-103(7) within the proposed spacing unit and has received no written objections per Rule 318A(I).e(6)B. Affidavit of mailing and certification of objections are attached. Tekton respectfully requests that the Rule 318A(I).a.(4)D Horizontal well and proposed spacing unit be approved. This well is being permitted under the provisions of Rule 318A(I).c.(3); an existing location exception waiver is already on file with the state [Doc#: 400231591] along with an associated request [Doc#: 400231590] for this location, thus no additional waiver or request has been attached. Distance cited in question #17 is to a occupied building.

Drilling/Completion Operations	Anti-Collision BMP: Prior to drilling operations, Operator will perform an anti-collision scan of existing offset wells that have the potential of being within close proximity of the proposed wells. This anti-collision scan will include definitive MWD or gyro surveys of the offset wells with included error of uncertainty per survey instrument, and compared against the proposed wellpath with its respective error of uncertainty. If current surveys do not exist for the offset wells, Operator may have gyro surveys conducted to verify bottomhole location. The proposed well will only be drilled if the anti-collision scan results indicate that there is not a risk for collision, or harm to people or the environment. For the proposed well, upon conclusion of drilling operations, an as-constructed gyro survey will be submitted to COGCC with the Form 5.
Drilling/Completion Operations	Bradenhead Monitoring BMP: Operator will comply with COGCC Policy for Bradenhead Monitoring During Hydraulic Fracturing Treatments in the Greater Wattenberg Area dated May 29, 2012.
