☒ No ☐ 0-300 ft. zone ☐ 301-500 ft. zone ☐ 501-2640 ft. zone

If the location is within a Rule 317B Surface Water Supply Area buffer have all public water supply systems within 15 miles been notified: ☐ No ☐ Yes

15. Comments:

Distance to nearest building is greater than 1 mile. Nearest railroad 2400' SW is abandoned. Nearest surface water 2076' NE is an unnamed low area. It was dry upon field observation. Nearest water well at 432' SE is a household use/stock well; Receipt #0418946, Permit #206634 with a depth of 125' and an unknown static water level. Water well Permit #98793 used for static water level. The location drawing and hydrology map show three water wells @432' SE, 450' SE, & 450' SE. These are not all available on COGCC GIS, but were confirmed to exist per field observation. The reference area is on undisturbed ground immediately adjacent to and East of the pad location as shown in the location photo facing East. Location is a two-well pad consisting of the proposed Circle Ranch LB08-62HN and Circle Ranch Federal LB07-62HN, with the production facilities within the pad disturbance; multi-well plan attached. No existing equipment. Equipment will be for the proposed Circle Ranch Federal LB07-62HN, Circle Ranch LB08-62HN, and Circle Ranch LB18-68HN. The location drawing shows an abandoned structure 375' SE and 390' SE. Upon field observation, there are remains of an abandoned house, including a foundation and rubble. Also Fee Mineral Ownership. Surface Use Agreement is attached to the Form 2 for the referenced wells.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.

Material Handling and Spill Prevention	Spill Prevention Control and Countermeasures (SPCC) plans are in place to address any possible spill associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR 112.
Storm Water/Erosion Control	Stormwater management plans (SWMP) are in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE) General Permit No. COR- 038637. BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.
Pre-Construction	Operator will participate in the Colorado Oil & Gas Association Voluntary Baseline Groundwater Quality Sampling Program.
General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls. Cleanup of trash and discarded materials will be conducted at the end of each work day. Cleanup will consist of patrolling the roadway, access areas, and other work areas to pickup trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly.
