Subject: FW: CPW recommended BMPs for the Iles Mountain 1-36 development

To: barbara.westerdale@state.co.us

Barbara,

Below is the email correspondence for this location. I apologize, I think I failed to include these BMP's in the Form 2 or 2A. I hope this doesn't create more work for you.

Thanks for your help,

Nancy Feck

Brenda,

The State Land Board (Lane) is okay with the CPW recommendations for the Iles Mountain 1-36.

Hi again Lane,

Here are CPW recommended BMPs for Swepi's Iles Mountain development.

Pad location: Iles Mountain 1-36, T5N, R92W, section 36

Wildlife concerns: The proposed pad location is within Elk Winter Concentration Area, Mule Deer Critical Winter Range, and Cutthroat Trout Designated Critical Habitat. Given the current site conditions,

no BMPs related to Cutthroat Trout are recommended at this time. Based on the above wildlife concerns, CPW recommends the following BMPs:

1. Where oil and gas activities must occur in mule deer critical winter range, and elk winter concentration areas, conduct these activities outside the time period from December 1 through April 15. Drilling and operations activities during the Dec 1 through April 15 time period may be possible if agreement is reached with CPW of an appropriate offsite mitigation project or phased development approach.
2. Restrict post-development well site visitations to between the hours of 9:00 a.m. and 4:00 p.m. from December 1 to April 15, to accommodate big game winter ranges.
3. Follow company guidelines to minimize wildlife mortality from vehicle collisions on roads.
4. Reclaim mule deer, and habitats with native shrubs, grasses, and forbs appropriate to the ecological site disturbed.
5. Install and utilize bear-proof dumpsters and trash receptacles for all food-related trash on location, following COGCC Rule 1204 a-1.

CPW would appreciate your concurrence with the proposed BMP's. Please let me know if you have questions.

Thank you,
