To: "Dave" 'Kubeczko (Dave.Kubeczko@state.co.us)' <Dave.Kubeczko@state.co.us>

Hi Dave,

Jennifer is out sick so I'm following up on this for her. Encana agrees to the COA's listed below, with the exception of COA 22. I have spoken to Denise Onyskiw and the water sample that was taken from the SG WD16A-19 C19 495 well is going to fulfill our water sample needs on the SG N30 495 pad. Therefore, Encana will not be collecting water samples on the SG N30 495 pad and does not agree to COA 22.

Also, there will not be any long term equipment on this location, so no tanks, separators, etc. We will have one water pipeline and one gas pipeline. You have my permission to update the 2A with this information.

Thank you for your help and please let me know if you have any questions.

Julia Carter

Dave,, there are a couple of the COA's that we are looking into internally before we approve the lot. I will have a definitive answer to you a little later today on that.

Please add a statement that the pipeline will follow the access road.

We do not have any COA's from the BLM for this location.

Please let me know if you have any questions or need anything additional at this time.

Thank you,

Jennifer
