Liz,

I am reviewing the Form 2A location assessment for the Dillard 20Y-HZ Pad. The location is in a Sensitive area due to its proximity to the Eaton Ditch. Please approve the following Condition of Approval be applied to this location:

"Operator must implement site-specific best management practices in accordance with good engineering practices, including, but not limited to, construction of a berm or diversion dike, site grading, or other comparable measures, sufficient to protect the Eaton Ditch located directly south of the oil and gas location from a release of drilling, completion, produced fluids, and chemical products."

Contact me with any questions.

Thank you,

Rick Allison, P.G.
