**Amber-** Please upload this email and the attachment to REM 6938 and Location ID: 324766

**Wayne-** Please monitor in the areas of SS-11 and SS-17. Come Spring and Summer time. Some spot application of the surfactant may be warranted at that time. Please monitoring the disturbed area for vegetation.

Thanks  
Alex

Alex and Annie,

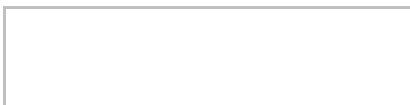

Attached is the remediation and the confirmation soil sampling report for the Laramie Energy II Fuqua 18-15 separator release that occurred in January 2012. With the exception of the stock pile of materials and isolated soil impacts closest to the well pad, the remediation has been successful in reducing DRO and ORO concentrations to levels that are below the Table 910-1 Concentration Level of 500 mg/kg.

James
