Subject: Re: Feuerstein I28-63-1HN Pad Form 2A 400348113

Justin,

I propose changing the distance to nearest water well to 720 feet and assume that there may be a water well somewhere on the property to the north. Let me know if you agree.

I know that it is in our procedures to not cross property lines on any on-site, so if it was on the other side of a property line, we would have missed it.

Justin.

Site specific would be a fine title for the BMP.

I understand what you are saying about the water well, but the form says a water well is 436 feet from the location. If an operator determines that not to be true, then they should find the nearest water well. If you review the Division of Water Resources scanned file for the water well 8770-R-R, it appears the well should be located on or near the north property line, if not on the property to the north, which could make the water well 720 feet from the proposed wells. Was this area included in the field inspection?

I will put comments like that one in the BMP tab in the future. Should I put them under site specific?

The 436' is a measurement from the GIS. The landman that walked that land did not see the well shown on the GIS upon field inspection. We're not saying we saw it somewhere else, or that the well shown on the map is something else, just that we didn't see it there when we looked there.

Subject: Feuerstein I28-63-1HN Pad Form 2A 400348113

Justin,

I am reviewing the Form 2A location assessment (Doc 400348113) for the Feuerstein I28-63-1HN Pad. Please address the following:

1. I moved the comment: "To protect building (house) 337' S of pad, sound barrier (hay bales) will be utilized on South side of pad." to the BMP tab. Please put comments like this on the BMP tab in the future.
2. If water well 8770-R-R was not found upon field inspection, then what water well is located 436 feet from the location? Please clarify and provide a revised distance to the nearest water well, if necessary.

Contact me with any questions regarding this Form 2A.

Best Regards,

Rick Allison, P.G.
