Surface Location – 422' FSL, 2481' FWL  
Section 10, T2N, R66W

Dear Mr. McPeek:

EnCana Oil & Gas (USA) Inc. ("EnCana") staked the McPeek 4-8-10 well at a surface location 2481 feet from the West line and 422 feet from the south line of Section 10, Township 2 North, Range 66 West (see attached survey plat). This well is being drilled under the rules and regulations of the Colorado Oil and Gas Conservation Commission's ("COGCC") Rule 318A known as the Greater Wattenberg Area Special Well Location, Spacing and Unit Designation Rule. This rule states that all boundary infill wells be drilled from the same surface locations as previously designated in Rule 318A.a.(1) which reads:

"In the Greater Wattenberg Area ("GWA"), operators may utilize the following described surface drilling locations (GWA windows") to drill, twin, deepen, or recomplete a well (GWA well") and to commingle any or all of the Cretaceous Age formations.

- (1) A square with sides four hundred (400) feet in length, the center of which is the center of any governmental quarter-quarter section ("400' window"); ...

The McPeek 4-8-10 well was staked at a location 297' southeast of the defined 400' window. As this location was staked with your consent and approval, EnCana respectfully requests your consent to an exception location for the McPeek 4-8-10 Well by waiver of the COGCC Rule 318A.a (1).
