Jan,

I am reviewing the Form 2A location assessment for the Bethyl GW 29-12 location. Please address the following:

1. Distance to surface water: If the surface water feature shown on the topographic map at 64 feet from the staked location is non-existent, then do state on the Form 2A that the distance to surface water is 64 feet. Please provide a revised distance to surface water.

2. Water well sampling: Please provide a BMP for baseline water quality sampling.

Contact me with any questions regarding this Form 2A.

Regards,

Rick Allison, P.G.
