RE: Facility #287698

PDC Evaporation Pit

SESE 25 – T6S – R97W

Garfield County, CO

Alex – As per our telephone conversation, attached are the following specific documents related to the subject facility:

- Form 15 - Earthen Pit Report/Permit: approved 10/31/06 and assigned Facility #287698
- Form 19 - Spill/Release Report: spill #2607885; submitted 7/21/08 for spill at adjacent tank battery; closed 7/20/10
- Form 27 - Site Investigation and Remediation Workplan: submitted 3/31/09 to address spill #2607885 and the subject pit closure; Remediation #5128 (document #2607886); closed as per e-mail dated 6/23/11 (document #2214628)
- COGIS – Pit Information for Facility #287698

PDC discontinued using the subject pit in 2008. Representative soil sample results indicated TPH, EC, and SAR concentrations above the applicable Table 910-1 standards. As a result, a Form 19 and a subsequent Form 27 were submitted. The Form 19 was closed in 2010 and the Form 27 was closed in 2011. However, the status of this pit is currently listed as **ACTIVE** within COGIS.

Given that remediation of this site was satisfactory as reflected in the COGCC e-mail dated 6/23/2011, PDC respectfully requests that the status of **Facility #287698** be changed to **CLOSED**.

Your assistance in this matter is greatly appreciated. Please call if there are any questions.
