REM # 5586 (Doc # 2524432)

Please upload this email as well....

Thanks Amber.

Tim,

I am closing the Remediation project # 5586, corresponding to the closure of the Hiawatha Deep 4-36 drilling and flare pits.

Based on review of data presented, it appears that no further action is necessary at this time at this site. However, should future conditions at the site be discovered of contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be significantly impacted, COGCC may require that further investigation and/or remediation be conducted.

Please keep this email on file as a confirmation that No Further Action is Required for the closure of the Hiawatha Deep 4-36 drilling and flare pits.

Thanks,

Carlos
