Permit	Received and attached new Deviated Drilling Plan and Directional Data. New TPZ footages are >460' from spacing unit boundary. Entered new TD and casing program. Ready to pass pending public comment.	2/12/2013 8:53:14 AM
Permit	Horizontal wellbore crosses lease lines within drilling and spacing unit; distance to lease line is 0'; distance to unit boundary is 460'. Distance to nearest property line changed to 263' per operator.	2/4/2013 8:31:00 AM
Permit	Confirming distance to nearest property line. Confirming distance to nearest well in the same formation (UPPR 38 Pan Am B1). I get 65' vs their number of 149'. Top of Producing Zone is too close (91') to north edge of Proposed Spacing Unit.	2/1/2013 2:44:01 PM
Engineer	Evaluated offset wells for adequate cement coverage.	1/22/2013 12:20:22 PM

Drilling/Completion Operations	<p>“Prior to drilling operations, Operator may perform an anti-collision review of existing offset wells that have the potential of being within close proximity of the proposed well. This anti-collision review may include MWD or gyro surveys and surface locations of the offset wells with included error of uncertainty per survey instrument, and compared against the proposed wellpath with its respective error of uncertainty. If current surveys do not exist for the offset wells, Operator may have gyro surveys conducted to verify bottomhole location. The proposed well may only be drilled if the anti-collision review results indicate that the risk of collision is sufficiently low as defined by the anti-collision plan, with separation factors greater than 1.5, or if the risk of collision has been mitigated through other means including shutting in wells, plugging wells, increased drilling fluid in the event of lost returns or as is appropriate for the specific situation. In the event of an increased risk of collision, that risk will be mitigated to prevent harm to people, the environment or property. For the proposed well, upon conclusion of drilling operations, an as-constructed directional survey will be submitted to COGCC with the Form 5.”</p> <p>At the time of permitting; the operator has identified the following well(s) as being within close proximity of the proposed well: THOMSEN 35C-18HZ: - UPRR 38 PAN AM B 1</p>
