Amber,

Please enter/upload the attached Form 04 and link it to its location ID (#424971). Please upload this email as well. Please copy Karolina, Chris, and myself with the doc. #

Thanks,  
Carlos

Karolina,

Thanks for your proactive attitude pointing out the correction to the SG 24-27 Form 04 submittal. I will ask our IT person to remove the previous submittal (Form 04, doc # 2224896) so that only the updated version will be in the database.

Carlos

Carlos,

Attached are COGCC Form 4s for the SG 24-27 cuttings management area and BCU 12-31-198 cuttings trench closures.

The BCU cuttings trench was the one that I had problems with the arsenic concentrations. As discussed with Chris Canfield, we collected 3 additional grab samples from the cuttings trench in anticipation that the arsenic would come below the backgrounds, which they did.

The SG 24-27 cuttings management area closure request was submitted earlier this year on 5/23/12 and approved on 5/30/12. However, I've recently realized that at the time of sampling, the drilling activities were not completed therefore the previous sample was not a good representative of the entire management area. I've re-sampled the cuttings and updated the results in the attached Form 4. Also, the previous Form 4 was submitted for a cuttings trench closure and we didn't have a trench on that location, we had a cuttings management area. Is there a way to take the previous submittal off the COGCC database and replace with the attached or maybe you know if having two submittals will create any additional problems in the future?

I apologize for my mistake; I'm not trying to make things more confusing on purpose.

Thank you and have a great afternoon,

*Karolina Blaney*
