

Document #663800829

Facility ID #334774

Inspection Date 3/15/2013

**Comments:**

**Equipment: Horizontal Heated Separator:** The separator is still in use and no repairs or replacement is scheduled at this time due to current use.

The 797-05-55D well (API 05-045-11962) was plugged in 2007. A cement top job was run on 3/19/2013 to top out the casing so that the wellhead could be cut off. A copy of the cement report is attached.
