Amber,

Please enter/upload the attached Notice of Completion Form 04 and this email and link them to:

REM #3805

Location ID # 336016

API #045 12391

Thanks,

Diane,

I am closing REM #3805 corresponding to the North Bank A spill remediation project. Please save this email as a confirmation that No Further Action is required regarding the North Bank A spill .

Based on review of data presented, it appears that no further action is necessary at this time at this site. However, should future conditions at the site be discovered of contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be significantly impacted, COGCC may require that further investigation and/or remediation be conducted.

Thanks,

Carlos

Please consider the environment prior to printing this e-mail...

I am working on the projects that Antero wants to close. So far I have the following;

- Grand Brothers (REM #5171). Closed two Form 27s and left one open as requested;
- Closed the 3 REM projects under REM #s 5399 and 5400 with Margaret Ash's approval;
- Entering and closing the remediation work plan Form 27 (see confirmation of NFA above) North Bank E.  
Please confirm that there was no Form 27 and/or 19 submitted in the past to COGCC (I couldn't find anything in the database), just to make sure we are not leaving anything behind.
- North Bank A (REM # 3805). In process of closing.
- North Bank E: In process of entering data and closing.
- Gentry C: In process of entering data and closing.

Carlos
