33. Comments Per the direction of the COGCC this application is being submitted as a refile of the API # 05-033-06155. This is an APD for a vertical borehole to be used for Seismic monitoring during the fracing of horizontal wells in the vicinity. No formation will be perforated in the vertical borehole. Thus there is no objective horizon, no distance to nearest well in same formation, no field name/number and no exception location is required. Depending on the success of the surrounding wells, a horizontal (-01) permit may be submitted in the future and this vertical borehole will be the pilot hole for the horizontal. The productive interval in the horizontal portion will meet the spacing order offsetfootages. Rig height top of mast to derrick floor = 146 feet.

34. Location ID: 413701

35. Is this application in a Comprehensive Drilling Plan ? ☐ Yes ☐ No

36. Is this application part of submitted Oil and Gas Location Assessment ? ☒ Yes ☐ No

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
