Hello all.

The primary point of conversation I had with Jane Stanczyk and Jay Krabacher was about well #3. Here is the GPS coordinates for the well that we show API # of 103-40024 and COGCC shows as 103-40285: 40.07107N 108.80426W. That is in NAD83.

 Subject
 Rio Mesa (op # 74740) request to
 P&A a well

*All data/documents
 changed to Government #3
 API 05-103-40285.
 Petrel #3 05-103-40024
 was deleted.*

Greetings:

First of all, I will ask Mr. Mike Hayes to duplicate the paperwork (the previous BLM submittal) on the P&A of a well his company calls the "Petrel #3". Can you fill out and send in a COGCC Form 6, Intent?

Attached is a word document trying to summarize some questions and (hopefully) answers on the well. I believe that the actual well is the "Government #3" (API 103-40285).

I spoke with Erica Miller on Monday, July 11 about this. She said that she had sent information to Jane S -- regarding other "misidentified" wells in the area (and I can't recall if she mentioned this well also). Erica also mentioned that she would be prepared to take the GPS measurements of the well in question.

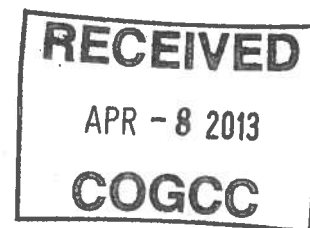

Regards,

Jay Krabacher

Mike:

Whatever this well is called, this is your 'verbal approval' to commence P&A operations. Please submit the COGCC Form 6, Intent, and GPS coordinates as soon as possible. Erika Miller from BLM has taken the measurements, and hopefully she also has PDOP, date of measurement, and presumably she is the GPS operator.
