Dave,

COGCC approves of the extension request to May 31st for the skim pit closures and remediation of oily waste.

As noted in your email, repair of leaking valves and other corrective actions required by the inspections such as installation of signs, tank placarding and removal of debris shall be completed by the original due date of April 30th.

Thank you,

John Axelson, P.G.

Ritchie has contracted me to respond to the violations noted in the Field Inspections Reports dated March 7, 2013 for two sites in Washington County. The two sites and report references are:

Peterson #1 COGCC Facility ID 233535 FIR 664000827 Kym Schure

Ann Allison #1 COGCC Facility ID 233483 FIR 664000829 Kym Schure

I plan to conduct inspections of these sites tomorrow and begin remediation of the sites on Monday, April 22nd. Ritchie will fix the leaking valves noted on the inspections right away. However, I will likely need an extension of the Corrective Action Date of April 30th to finish the backfilling and site reconstruction. I will send you a Form 27 for each site next week. Can I have an extension until May 31st for these sites?

Dave
