Justin,

The following requests (in italics) were attached to the Form 2A by the Arapahoe County LGD. Please provide a response in writing to COGCC (via email to me) that addresses each of the county's requests. The email should include Conoco's decision to address or not address each item, and if appropriate, a Best Management Practice (BMP) for each item. County request item #4 (closed loop system) is on the Form 2A and will not require a BMP. At your direction, I will include Conoco's BMPs and/or concurrence with the County's requests on the Form 2A. Please contact me with questions/concerns. Thank you.

The County requests incorporation of the following into the approved Form 2A, as BMPs:

- 1) The Applicant is responsible for dust control on the access road and the well pad.*
- 2) The Applicant will do baseline water quality testing of water wells according to the recently approved COGCC Rule 609 and will also do baseline water quality testing of all water wells within 1/2 mile of the oil and gas well if requested by the water well owner.*
- 3) The Applicant will have all lights during the drilling phase directed in a downward position.*
- 4) The Applicant will use a closed-loop system.*
- 5) The Applicant will be responsible for noxious weed control on any disturbed area, from the construction phase to the closure of the well or facility.*
- 6) The Applicant will post 24-hour company contact information at the intersection of the access road and the public road.*
- 7) The Applicant will time and plan mobilization, hauling, and construction to minimize conflicts with school buses.*
- 8) The Applicant will submit copies of any Form 19 submitted to COGCC for this well or its production facilities to the County LGD.*

The following is a list of County Conditions of Approval addressed through the Use by Special Review process:

The Applicant will obtain all necessary County permits, including Building, Access, Grading, Erosion, and Sediment Control (GESCC), Oversize/Overweight, and Floodplain permits, as applicable.

John,

ConocoPhillips has addressed each of these concerns with the county and have plans with them to deal with each concern.
