Per Colorado Oil and Gas Conservation Commission (COGCC), Section 603 (a) 2, Series Safety Regulations, Drilling and Well Servicing Operations and High Density Area Rules, Statewide Setbacks provides:

A well shall be a minimum distance of one hundred fifty (150) feet from a surface property line. An exception may be granted by the Director if it is not feasible for the operator to meet this minimum distance requirement and a waiver is obtained from the offset surface owner(s). An exception request letter stating the reasons for the exception shall be submitted to the Director and accompanied by a signed waiver(s) from the offset surface owner(s). Such waiver shall be written and filed in the county clerk and recorder's office and with the Director.

I hereby state that I am the surface owner of the adjacent property located to the South of the proposed Pinto 3-17 well to be constructed by D. J. Simmons, Inc. (the applicant), as shown on the attached Proposed Well Location Survey. **I understand that the subject project will be located within the COGCC's required Statewide Setback from surface property lines, and I do not object to the proposed wellhead being located within the area required as a setback distance from the adjacent property line, as required by Section 603 a (2).** This file shows the wellhead will be located 145.6 +/- feet of the adjacent surface property line to the South.
