Distance (in feet) to nearest surface water: 1548, water well: 635, depth to ground water: 5

Is the location in a riparian area: ☒ No ☐ Yes Was an Army Corps of Engineers Section 404 permit filed ☒ No ☐ Yes

Is the location within a Rule 317B Surface Water Supply Area buffer zone:

☒ No ☐ 0-300 ft. zone ☐ 301-500 ft. zone ☐ 501-2640 ft. zone

If the location is within a Rule 317B Surface Water Supply Area buffer have all public water supply systems within 15 miles been notified: ☐ No ☐ Yes

### 15. Comments:

Static water level was determined from water well permit #242234- -, located (SWSE) Sec. 6-T7N-R80W, approximately 635' northeast from location. This well pumped at a rate of 15 gpm with a static water level of 2'. There is no elevation listed for this well, but topographic maps show it as approximately 5' below location. Correcting for this difference results in an estimate of 7' to groundwater at location. This is what has been reported above. Location has been marked as a "sensitive area" due to proximity to surface waters and depth to groundwater. There are two wells on-site and one is a vertical pilot hole, thus the sidetrack plat is a multi-well plan, and has been attached as such.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
