

ATTACHMENT

Oil and Gas Production Equipment That May Be Required

- Well Head and Tubing Assembly
- Interconnecting Piping
- Instrumentation and Safety Valves
- Separator—Primary - Winterized
- Heater Treater or Crude Oil Dehydrator—Winterized
- Oil Storage Tanks—Welded Steel API 12F, 6 (Six) 400 BBL Tanks—All Heated
- Water Storage Tanks—Welded Steel API 12F, 4(Four) 400 BBL Tanks—All Heated
- Slop Tanks—Welded Steel API 12F, 2 (Two) 210 BBL Tanks - All Heated
- Stairs and Walkways for all tanks
- Lighting
- Gas Compressor—IC Engine—With Compressor Shed Closed on three sides
- Filter Separator—Winterized
- Fuel Gas Conditioning Skip—Winterized
- Glycol Gas Dehydrator—Winterized
- Truck Loading Facility
 - Truck Rack with Hoses
 - Water Transfer Pump
 - Tanks Bottoms Pump
- Telemetry Equipment with Radio Tower 40-Foot Tall with Antenna
- Sales/Buy Back Gas Metering Station with Metering Equipment and Interconnecting Piping
- Pipeline to Connect Tank Battery to Natural Gas Pipeline Source
- Propane Storage Tank (If Natural Gas is not available)
- Propane Fuel Electric Generator (If Natural Gas is not available)
- Artificial Lift Equipment—Submersible Pump, Gas Lift, Beam Pumping Unit (a/k/a Pump Jack), or Hydraulic (Uni-Draulic) Type
- Security and/or Livestock Fencing
- Piping Bollards or Barrier Piping around above ground facilities
- Roads and all weather equipment and well pad surfaces
- Cathodic Protection Ground Bed
- Required Signage per Regulatory Requirements
- Concrete Foundations under critical equipment
- Lube Oil, Antifreeze, MeOH (Methanol), and Other Well Chemical Treatment Storage Tanks, Injection Pumps, and Piping
- Wind Socks and Other Misc. Safety Equipment
- SPCC, Storm Water, and/or Secondary Containment civil structures, as required by regulatory requirements
