

WPX Energy Rocky Mountain LLC Produced Water Recycling and Disposal Destinations

Water stored in the Smith Gulch 31-32-796 multi-well pit (COGCC facility #432534) will be re-used and recycled in hydraulic fracturing operations on the following well pad locations*.

Well Pad	Number of Wells
SG 14-23	1
SG 42-22	12
SG 23-22	19
GM 34-14	11
SG 24-22	4
SG 21-27	4
SG 43-28	16
SG 43-15	9
SG 32-27	1
GM 22-13	12

* Based on the current drilling schedule

When the hydraulic fracturing operations in the Smith Gulch field are completed, water will be managed at Parachute Centralized E&P Waste Management Facility (COGCC facility #149006) where it will be naturally evaporated, reused in fracturing operations, or injected into any of the following approved UIC facilities.

Facility Name	Type of Facility	COGCC Facility ID
GM 523-36	Injection Well	159266
GM 14-36	Injection Well	159262
GM 923-1D	Injection Well	159295
GM 943-1D	Injection Well	159296
GM 931-1D	Injection Well	159297
GM 239-36	Injection Well	159369
Danish Flats Environmental Services	Commercial Facility	Grand County Council Resolution 2798
Harley Dome #1 SWD	Commercial Facility	UIC-358-1

All solids generated during pit closure will be disposed off at ECDC commercial facility. Any fluids that can't be reused or injected will be disposed off at Danish Flats Environmental Services.

Facility Name	Type of Facility	Facility Permit #
Danish Flats Environmental Services	Commercial - Liquids	Grand County Council Resolution 2798
ECDC Environmental LC	Commercial - Solids	Class V Landfill Permit Application Document #01.000631
