Subject: CPW recommended BMPs for Peakview Operating Company's Kowach 24-9 SWD

Good morning Terry,

Listed below are CPWs recommended BMPs for the proposed Peakview Operating Company's Kowach 24-9 SWD.

Pad location: Kowach 24-9 SWD, T6N, R90W, section 9 at 40.485144, -107.499270
Document #: 400399812

Wildlife concerns: The proposed pad location is within greater sage-grouse Preliminary General Habitat and Elk Winter Concentration Area. Given the proximity to previously developed areas, no greater sage-grouse specific BMPs are recommended at this time. Additionally, no winter timing restrictions are being recommended for elk, as game damage by elk in the surrounding land during the winter months is an issue. Based on the above wildlife concerns, CPW recommends the following BMPs:

1. Establish company guidelines to minimize wildlife mortality from vehicle collisions on roads.

2. Include a weed management plan and implement the plan as part of reclamation.
3. Install and utilize bear-proof dumpsters and trash receptacles for all food-related trash on location, following COGCC Rule 1204 a-1.

CPW would appreciate your concurrence with the proposed BMP's. Form 2A comments for this location are due on **Wednesday May 29, 2012**. Please let me know if you have questions.

Thank you,

Jacob Davidson
