COGCC Comments

Comment	User	Date
<p>Weather: high 70's/low 80's, sl cloudy (mostly sunny), no breeze. Going to be HOT today. 3P: over 90 deg f.</p> <p>I pursued options to facilitate heavy eqpt access into loc – and ended up contacting GJ Pipe's "UNA" Gravel Pit – located about 10 miles east. 285-2525, cobble @ \$23/ton. We hired DIA Construction (Debeque) to acquire and transport a dump-truck load to location. 905: crew working at entrance, leveling cobble. Did get smaller eqpt units onto loc: misc tool flatbed, cable-spool/power (for rig) trailer, welding unit/trailer.</p> <p>PLAN @ Pasture: the casing is 8.75", Magna will drill through with a 6.25" bit – (fitting through a 7.125" BOP). Will be 2" + of cement remaining inside the casing. We decided that the Biscuit wellhead, about the same size as the Pasture casing, should fit the open casing here. Weld it on.</p> <p>Pasture wellhead being cut and smoothed at top. 1250: Jeremy (not 'boss Jeremy') from DIA out with dump-truck with 12 tons rock. Couldn't spread it out along access intersection due to possibility of overhead power-line contacting (arc-ing) top of truck.</p> <p>1500: track-hoe here, start smoothing/spreading cobble. Also water-truck, BOP/Accum, flatbed with tubing. 1605: moving all vehicles except rig/work-over in. Compacting road! 1645: Rig in – "uneventful."</p> <p>1730: working on cutting Biscuit wellhead to fit onto smooth-top of Pasture casing. 1830: got Biscuit wellhead to fit (to be welded) onto Pasture casing. 1830: JK leaves loc, Magna soon.</p>	krabachj	08/06/2013
