Mr. Neher,

The COGCC is reviewing the above-mentioned Form 2A. In order to complete our review, we request the following items are addressed:

If Chemco is planning on using the pre-existing production facility for the Chemco Donohoe 4, API # 05-061-06502, the Form 2A should be for an amended location (Location ID #384662). This will allow a continuation of the information on file, including prior inspections and the resolved NOAV. I will change the type of filing to "amend existing location" and enter the Location ID with your approval.

COGCC also requests your concurrence on the following Conditions of Approval:

- 1) Provide COGCC 48 hour notice prior to commencing construction via a Form 42.
- 2) If drilling has not commenced for the Donohoe 4A-2 well by the estimated date that interim reclamation will begin (stated on the Form 2A), all production equipment shall be removed and interim reclamation shall be completed within 30 days of that date. The interim reclamation shall include removal of the existing tanks and all other production equipment.
- 3) If the Donohoe 4A-2 well is plugged and abandoned, all production equipment shall be removed and interim reclamation completed within 3 months of plugging and abandonment. The interim reclamation shall include removal of the existing tanks and all other production equipment unless the operator provides evidence that this equipment will be reasonably needed within 12 months.

Please Respond in writing to this email. Feel free to call or send an email if you have questions or concerns.

Best Regards,

John

Mr. Noto:

We concur with your Conditions of Approval. I will put that in writing in a letter addressed to you.

I presume that if you are changing the type of filing to show an amended existing location that we needn't submit anything further on that point. If I am incorrect on that please let me know.

Thank you.

Graydon Neher

Mr. Neher,

Your concurrence by email is sufficient for adding the COAs to the Form. I will also change the Form to Amend Existing Location to location ID #384662, no additional submittals are needed.

Thanks,

John
