**Subject:** HSR-KOFLER 14-14A - hole in casing  
**Date:** Tuesday, July 30, 2013 9:30:10 AM

---

Diana,

While completing a safety prep on the **HSR-KOFLER 14-14A (API# 05-123-15689)** we found a hole in the casing between 5212'-5243'. We have circulation to surface through the hole.

We plan to pump 15bbl (75 sacks) of Class "G" cement with 1% CaCl to repair the hole. Following the repair we will pressure test the casing to 1000psi.

Can we please have a verbal approval to complete this work? Our current plan is to cement first thing tomorrow morning (7/31).

Thanks,

**Laura Wellman**
