Group	User	Comment	Date		
OGLA	kubeczkod	<p>SITE SPECIFIC COAs:</p> <p>Flowback and stimulation fluids must be sent to tanks, separators, or other containment/filtering equipment before the fluids can be placed into any pipeline or pit located on the well pad or into tanker trucks for offsite disposal. The flowback and stimulation fluid tanks, separators, or other containment/filtering equipment must be placed on the well pad in an area with additional downgradient perimeter berming. The area where flowback fluids will be stored/reused must be constructed to be sufficiently impervious to contain any spilled or released material.</p> <p>The moisture content of any drill cuttings in a cuttings pit, trench, or pile shall be as low as practicable to prevent accumulation of liquids greater than de minimis amounts. At the time of closure, the drill cuttings must also meet the applicable standards of table 910-1.</p>	10/09/2011		
Agency	kertr	Power lines are to be relocated to allow for appropriate setback, see location drawing.	10/21/2011

**Wildlife BMPs:**

BMP Type	Comment
Interim Reclamation	<p>PRODUCTION/RECLAMATION BMP's</p> <ul style="list-style-type: none"> <li>Utilize staked soil retention blankets for erosion control and reclamation of large surface areas with 1.5:1 or steeper slopes. Avoid use of plastic blanket materials.</li> <li>Restore both form and function of impacted wetlands and riparian areas and mitigate erosion.</li> <li>Remove well pad and road surface materials that are incompatible with post-production land use and re-vegetation requirements</li> <li>Use only certified weed-free native seed in seed mixes, except for non-native plants that benefit wildlife</li> <li>Williams will use certified, weed free grass hay, straw, hay or other mulch materials used for the reseeded and reclamation of disturbed areas.</li> <li>Install exclusionary devices to prevent bird and other wildlife access to equipment stacks, vents and openings.</li> <li>Reduce visits to well-sites through remote monitoring (i.e. SCADA) and the use of multi-function contractors.</li> </ul>
Planning	<p>PLANNING BMP's</p> <ul style="list-style-type: none"> <li>Share/consolidate corridors for pipeline ROWs to the maximum extent possible.</li> <li>Maximize the utility of surface facilities by developing multiple wells from a single pad (directional drilling), and by co-locating multipurpose facilities (for example, well pads and compressors) to avoid unnecessary habitat fragmentation and disturbance of additional geographic areas.</li> <li>Avoid constructing any road segment in the channel of an intermittent or perennial stream</li> <li>Combine and share roads to minimize habitat fragmentation</li> <li>Maximize the use of directional drilling to minimize habitat loss/fragmentation</li> <li>Maximize use of remote telemetry for well monitoring to minimize traffic</li> <li>Minimize the duration of development and avoid repeated or chronic disturbance of developed areas. Complete all anticipated drilling within a phased, concentrated, development area during a single, uninterrupted time period.</li> </ul>
