H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

--

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

Description

--	--	--

Operator Comments:

Outside of the historical Parkman production area in the Greely field, the locations of the planned Parkman recomplete wells represent new plays. The engineering, geoscience and completions work for the planned Parkman recomplete wells represent Noble's competitive advantage. In order to maintain Noble's competitive advantage in the exploration of these new plays for the benefit of all stakeholders, including landowners and the State of Colorado, Noble requests tight hole status for this well.

There are no wells that have produced or are producing in the Parkman formation within 1 mile of this location.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Signed: _____ Print Name: Cheryl Johnson

Title: Completions Supervisor Email: cheryljohnson@nobleenergyinc.com Date: _____

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.
