Venessa,

The COGCC has reviewed in the information provided by BBC and information available on the COGCC website for the following API numbers:

123-37756  
123-37755  
123-37751  
123-37750

During the review a pre existing sample location (750123) was found on COGIS maps, however no analytical data had been submitted for the location. This location is the same well (DWR permit # 221096) that BBC was denied access to. Because the owner has granted access in the past BBC will be required to collect a post drilling sample from this well as described in rule 318Ae(4).

The Exception requests will have the following COA placed on them:

Approval of this Exception Request is for the Pre Drill sample only.

The operator must make an attempt to collect the post drilling sample as described in rule 318Ae4 from Facility ID 750123 (DWR permit # 221096). If the well owner denies access for collection of a post drilling sample a Sundry Notice will be required. The Sundry Notice should document the good faith efforts of BBC to collect the sample as described in rule 318Ae4.

Please respond to this email confirming that you have reviewed the COA or if you have any questions regarding the Exception requests. The requests will be placed on Hold until a confirmation email has been received.

Thanks,

Arthur

Venessa,

We still need a response for the referenced Sundries. I cannot approve the Sundries until BBC recognizes the conditions of approval that will be placed on them. If we do not hear back from you in 10 business days the Sundries will be denied.

Thanks,

Arthur

BBC has reviewed the below mentioned COA and will adhere to.

Thanks,

Venessa Langmacher

Senior Permit Analyst
