Operator Comments:

The wrong plat was used on the permit, but all backup documentation (directionals, directional template, distances to cultural features) was measured using the correct footage to section line (250') and was attached to original permit. Surface hole from the north of the section line and latitude are the only items that changed. Correct plat is attached.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
