Wildlife BMPs:

BMP Type	Comment
Traffic control	1. Temporary access road at south end of location to minimize traffic impacts to nearby subdivision 2. Sundance has agreed to control drilling and completion traffic to minimize subdivision access problems and noise A.) No truck traffic allowed from 10pm to 6am unless emergency situation occurs B.) No hauling to/from site during before and after school times (7am-8:30am & 2pm-3:30pm Monday through Friday) C.) Sundance will provide site/traffic control supervisor (site guard 6am-10pm) D.) Will make best efforts to haul oil & water only during daylight hours E.) Sundance agrees to a hauling route with the Town for all drilling and completion traffic
Noise mitigation	1. 12-16' high sound barrier (hay bales) on W/N/E sides of the drilling location 2. Will run sound survey to confirm noise level at or below decibel levels in Rule 802 3. Will apply further noise reduction measures as necessary (motor blankets, etc.)
Planning	1. Sundance agrees to use all & best efforts to drill all 4 wells before August 15th or 16th (start of the school year) 2. Create & follow a landscaping plan to screen production/operations site for neighborhood - agree to specifications with Town and closest homeowners at neighborhood meeting 7/9/2013.
Drilling/Completion Operations	1. Site guard on site from 6am-10pm daily while drilling and completion operations take place 2. Drilling location fenced in 4' safety fence on W/N/E sides to block access 3. Pedestrian traffic supervision on existing walking path around W/N/E sides of location

Complaint

Comment: Depth 1449 ft. This wellsite was inspected for a noise and odor complaint. I was unable to get reliable readings at this time due to a front moving into the area the wind was gusting and exceeded the necessary <5mph. the following readings were noted after the sound meter was calibrated all readings were taken on the "A" scale slow mode and were 350 ft from the Noise source unless noted. North—61 db, East—60 db, South—62 db, West—59 db (315 ft). There is a professional sound mitigation of 20 ft tall sound walls surrounding the East, North, and the West side of the drilling site. There is no Mitigation on the South side. There is also a sound wall on the West side of the draw works engine on the rig floor. Diesel Engine exhaust is visible from the draw works engine when they are moving the blocks. A return inspection is necessary.
