Good afternoon Doug,

Please see the new Location Drawing for Location ID330155 . Noble filed a Sundry (Doc. 400456569) asking if the Commission would approve 3 acres to be added on to this location. This would have brought the location to a total of 5 acres. Noble and the COGCC agreed that this increase would have been deemed as a substantive change per Rule 303.d. Per our conversation of discussing the location into detail, it was determined that Noble over permitted the increase in size due to an existing well and the existing battery site. Noble will only need one additional acre to be added to our permit so that we can add our new equipment of 1 tank, 1 separator, and 1 water tank due to a new production facility design and internal Noble safety set back. This would bring the size of disturbed area during construction to a total of 3 acres with the size of interim reclamation to 2 acres.

Please let me know if any additional information is needed within the review of this location.

Kindest regards,

Kate Miller  
Sr. Land Technician  
Wattenberg Land Department
