Cliff,

The COGCC is reviewing the above-mentioned Form 2A. In order to complete our review, we request that you address the following issues:

- 1) The estimated date for interim reclamation on the form is 15 days after planned construction date. I will update the form if new date(s) are provided.
- 2) 1. Per Rule 100, the proposed location is defined as a Sensitive Area because it is in the Northern High Plains Designated Basin and the Sand Hills Groundwater Management Area. With your approval, I will mark the "yes" box for sensitive area on the Form 2A.
- 3) The 1,000 foot radius on the hydrology maps are apparently from the reference point rather than the planned oil and gas location (planned disturbed area).
- 4) There is an apparent pit or pond in the crop circle and field road within 400 feet of the planned location. Please provide a location map with these and all other visible improvements identified within 400' of the planned location and I will attach it to the Form 2A.

Please feel free to call or email if you have questions or concerns.

Best Regards,

John

To: "Noto - DNR, John" &lt;john.noto@state.co.us&gt;

Attached you will find a Hydrology plus 1000' from the pad location.

I have identified a portion of a 2-track road to the Northwest of the pad which is approx 427' away.

I have identified surface water which is just northeast of the two track and lying 788' from the surface location.

I have identified a water sprinkler base which lies due east of the surface pad and is 745' from the easterly portion of the surface pad.

Thanks for your help on this and let me know if you need any revisions or modifications.

Cliff Williams
