Description

Operator Comments:

Lost circulation was not encountered in the intermediate 12-1/4" hole section to 1700' and 8-5/8" intermediate casing will not be run. Operator plans to drill the 7-7/8" production hole to TD as planned. This will not affect the 5.5" production casing port collar depths for stage cementing the Cheyenne & Dakota sandstones.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
