**OPERATOR COMMENTS AND SUBMITTAL**

Comments: Nearest above ground utility is 940 ft from this existing well. Distance to the nearest property line is 327 ft. Nearest building (BRE field office) is 3161 ft from this existing well. This well is currently a shut-in J-sand well in the Adena field. Plan to reactivate the J sand - if not successful then will recompleat in the D sand. Plan to set CIBP bove J perms and recompleat in the D sand. A form 2A is not required for this recompleat because no pit will be constructed and there will be no surface disturbance beyond the originally disturbed area. No conductor casing was set when this well was drilled; the casing consists of surface casing and a production string.
