Laura,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comment.

1) In the Water Resources section of the Form 2A you have indicated that a Rule 901.e Sensitive Area Determination was performed but you have not provided any information concerning it as an Attachment. Please provide me with the Sensitive Area Determination information and results that you have obtained and I will add it to the Form 2A. If a Rule 901.e Sensitive Area Determination was not conducted and this box was erroneously marked as YES, please let me know and I will change it to NO on the Form 2A.

Please feel free to contact me if you have any questions. Thank you.

Hi Doug,

1.) It is my understanding that we were not required to provide the sensitive area determination on forms submitted prior to August 1<sup>st</sup>. Is that correct? We never provided this information until the new rules were in effect.

Thank you,

**Lauren Kucera**

Lauren,

August 1 has no bearing on whether or not an operator needs to submit the findings of a Rule 901.e Sensitive Area Determination. If an operator has checked that they have conducted this determination, they should include the results and findings of it with the Form 2A. If this determination was conducted please send me your results and findings. If it was not, please let me know and I will change the Form 2A to indicate it wasn't.

Please feel free to contact me if you have any questions. Thank you.

Hi Doug,

1.) Sensitive area determination: The closest water well 1759' W has a depth to ground water less than 20'

(DWR permit 17336-MH).

I apologize for these errors. I believe I have answered all of your outstanding questions. Please let me know if I have not, or if you need anything else.

Thank you,

**Lauren Kucera**
