Distance to nearest railroad is greater than one mile. Nearest surface water 290' S is a ditch. Abandoned dirt irrigation ditch 1' N and low area 136' N (which were dry at time of field observation) will be filled in during location construction per landowner's request. Nearest water well 215' NE is not presently shown on COGCC GIS. Water well Permit #44072-MH used for static water level. Location is sensitive due to depth to groundwater. The reference area is on undisturbed ground immediately adjacent to and North of the facility location as shown in the location photo facing North. Location is the production facility for the proposed No Worries PC G14-62-1HN (Doc #400444482) and No Worries PC G14-65-1HN (Doc #400444484) and the permitted but not drilled No Worries PC G14-63-1HN (API: 05-123-36328) and No Worries PC G14-64-1HN (API: 05-123-36329). Best Management Practices

No BMP/COA Type

Description

1	General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls. Cleanup of trash and discarded materials will be conducted at the end of each work day. Cleanup will consist of patrolling the roadway, access areas, and other work areas to pickup trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly.
2	Storm Water/Erosion Control	Stormwater management plans (SWMP) are in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE) General Permit No. COR- 038637. BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.
3	Material Handling and Spill Prevention	Spill Prevention Control and Countermeasures (SPCC) plans are in place to address any possible spill associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR 112.
