

PLANNING BMP's

- * Maximize the utility of surface facilities by developing multiple wells from a single pad (directional drilling), and by co-locating multipurpose facilities (for example, well pads and compressors) to avoid unnecessary habitat fragmentation and disturbance of additional geographic areas.
- * Maximize the use of directional drilling to minimize habitat loss/fragmentation
- * Maximize use of remote completion/frac operations to minimize traffic
- * Maximize use of remote telemetry for well monitoring to minimize traffic

DRILLING/COMPLETIONS BMP's

- * Conduct well completions with drilling operations to limit the number of rig moves and traffic.

PRODUCTION/RECLAMATION BMP's

- * Use only certified weed-free native seed in seed mixes, except for non-native plants that benefit wildlife
- * WPX Energy will use certified, weed free grass hay, straw, hay or other mulch materials used for the reseeding and reclamation of disturbed areas.
- * Install exclusionary devices to prevent bird and other wildlife access to equipment stacks, vents and openings.
- * Reduce visits to well-sites through remote monitoring (i.e. SCADA) and the use of multi-function contractors.
