H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: 520 in ppm (parts per million) Date of Measurement or Sample Collection 08/27/2013

Description of Sample Point:

The H2S reading was collected from the thief hatch on a production tank following treatment.

Absolute Open Flow Potential 0 in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

The source of H2S was not flowing and the potential for atmospheric release was minimal since it was contained within a tank.

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: 1.05 MILES

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: 1 MILES

COMMENTS:

The COGCC and LGD for Garfield County were notified of the H2S reading with 48 hours via email (8/27/13). Additional treatment was immediately added to the tank and it was rolled until the field meter indicated a reading of 0 ppm. Measurements collected 50 feet away from the tank were 0 ppm.
