COMMENTS:

COA 22 on the approved Form 2A for this location requires the collection of surface water samples from Hayes Gulch (if water is present) prior to injection well operations. An inspection of Hayes Gulch just above and below the GM 245-1 pad on 8/28/2013 indicated that no water was present and no samples could be collected. Because Hayes Gulch is not a perennial stream, an attempt will be made to collect a sample during spring runoff in 2014 and, if successful, additional samples will be collected every 12 months after that (until well pad closure).
